

Higher Speed Ethernet: From the Cloud to the Data Center

About the Ethernet Alliance

While IEEE 802 Ethernet technology has existed for over 30 years, it has lacked an industry voice that represents the spectrum of standards-based Ethernet. The Ethernet Alliance serves the Ethernet industry to assist with the on-going incubation, development, interoperability testing and support of technologies based or dependent upon Ethernet standards.

WHO WE ARE:

The Ethernet Alliance is a global community that includes system vendors, component vendors, end users, industry experts and university and government professionals who are committed to the continued success and expansion of Ethernet technology.

MISSION:

The Ethernet Alliance brings Ethernet standards to life by supporting activities that span from incubation to interoperability demonstrations and education.
